Enterprise Ready Integrations

Domain adaptation at scale

**dociphi™**  
Gen AI enabled Document Processing

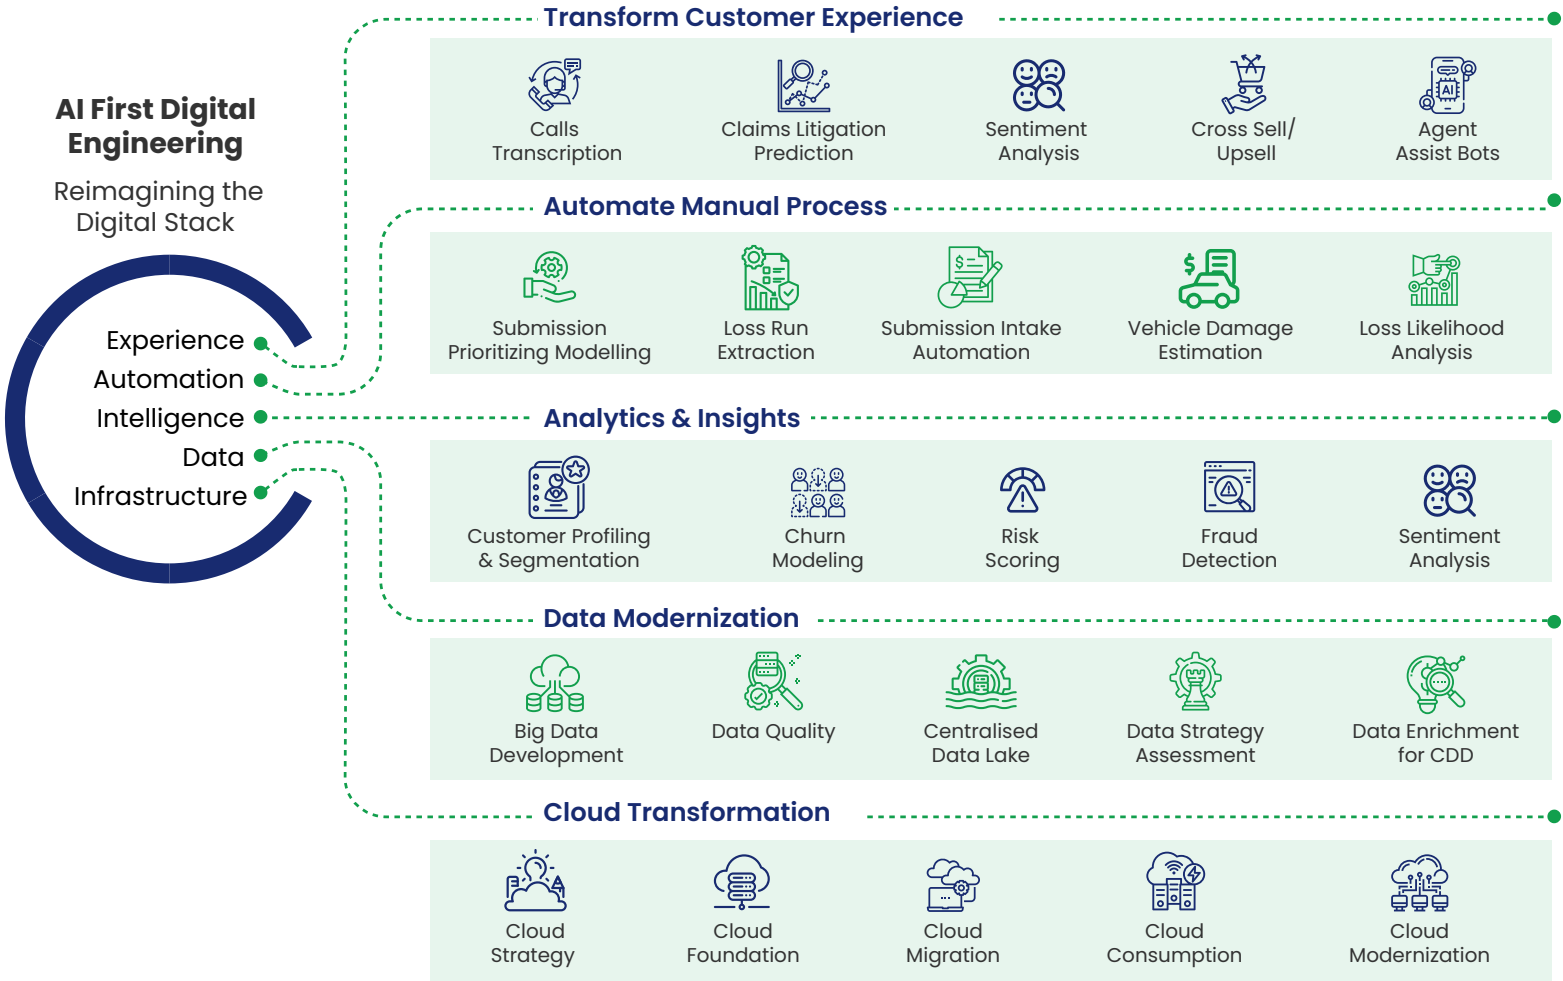

In-domain QnA

Automated claim and policy document summarization

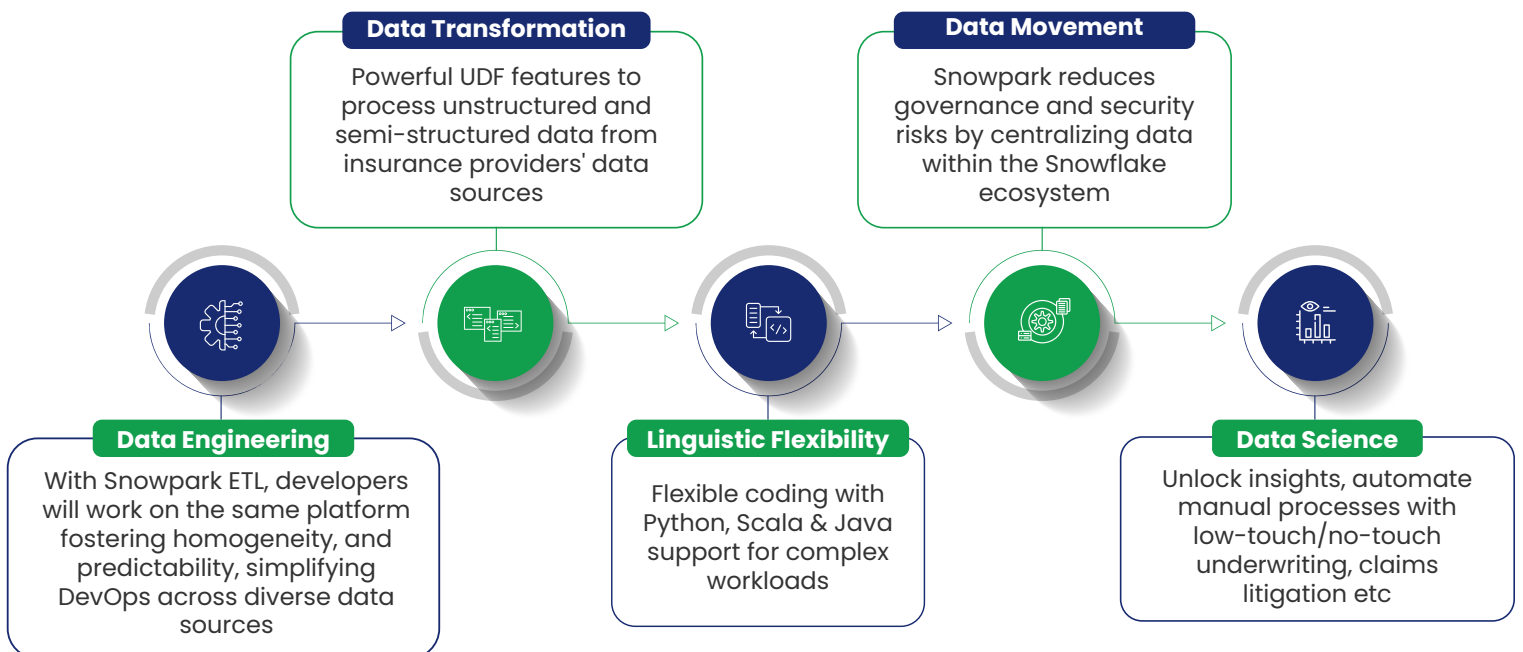

Customized quote and policy document generation

Discrepancy email generation, and more

# Quantiphi's rapid start packages across insurance value chain

## How AI-powered solutions on Snowpark can transform the insurance industry?

## Key success stories

### Predicting Purchase Propensity

**~47%** Improvement in accuracy of mortgage purchasing model

Quantiphi migrated and stitched data leveraging feature engineering capabilities and built a new machine learning model on connected data that helps in **optimizing current models** and **improves overall customer** targeting for mortgage services

### Customer Lifetime Value Modelling

**90%** Model accuracy with better customer targeting through look alike NBOs

Quantiphi optimized **customer retention rates** by understanding their current and future value leading to **optimized launch** of related NBO. Identified the products and plans that lead to customer retention and integration

### Risk Scoring and Pricing

**~10%** Reduction in loss ratio with topline improvement with better and data based pricing

Built ML Models to recommend a range for **doctors insurance premium** based on given set of features. An interactive dashboard was built to track and monitor **current pricing** across various LOBs to recommend users with appropriate actions

### Underwriting Submission Prioritization

**+7%** Improvement in Bind Ratio & Reduction in avg cycle time to <15 minutes/policy

Client is **fortune 500 Commercial Speciality insurer**. Due to manual processes and high touch points in the submission to quote funnel with an average cycle time of **90 min/submission**, ~20% of the submissions go unattended leading to a low submission to bind ratio

### Fraudulent Claims Detection

**7x** Increased discovery of high risk cases as compared to heuristic methods

Quantiphi created a model to **analyze data** trends and identify fraudulent claims in their workers compensation line of business with a **30% Reduction** in manual effort

### Contact Center Modernization

**~40%** Improvement in operational efficiency and ensured live agent connection for real time guidance

Client is seeking to modernise their Contact Center leveraging **AI/ML capabilities** The solution was capable of capturing caller information and identifying the pain points by translating, analysing and categorising root cause to develop an **interactive dashboard**

## Leverage our industry leading talent pool to accelerate your digital transformation journey

**410+** Snowpro certified professionals

**46+** Snowflake accreditations

**450+** with hands on experience

## Awards & Accolades

Quantiphi is an award-winning AI-first digital engineering company driven by the desire to reimagine and realize transformational opportunities at the heart of business. We are passionate about our customers and obsessed with problem-solving to make products smarter, customer experiences frictionless, processes autonomous and businesses safer.
