

Addressing the Core Challenges

In the fast-paced world of legal operations, managing contracts is often a daunting and time-intensive task. Legal teams are burdened with the meticulous review of critical clauses, the painstaking process of redlining, and the management of multiple contract versions. These workflows are not only time-consuming but also highly susceptible to human error, leading to inefficiencies and potential legal risks.

Simplifying Legal Contract Management

Quantiphi's GenAI platform powered by AWS, is designed to tackle the toughest challenges in legal contract management. Using advanced Large Language Models (LLMs), baioniq automates tedious tasks such as information extraction, redlining, and version control. This solution streamlines complex workflows, freeing up valuable time for the legal teams.

Features

Contract Summarization

Identify separate sections and get summaries on reference contract sections

Contract Redlining

Automate redline generation and get suggestions with a rationale to streamline the review process

Contract Comparison

In-depth comparison of multiple contracts, review distinctions and similarities with precision

Benefits of GenAI-powered Legal Contract Management

Improved
compliance and
risk management

Faster contract
drafting and
review processes

Flexibility to adapt
to changing legal
standards

Increased
productivity and
scalability

Customer Success Stories

Streamlined NDA Review Solution for a leading Logistics Company

Challenges

- Manual review process took up to a week per NDA
- Human errors and oversights risked legal and financial exposures
- Keeping up with evolving legal terminology and regulatory changes was challenging

Solution

- Developed an intelligent document processing solution to streamline the NDA review process
- Automated extraction of key clauses and flagged unacceptable language

Impact

- Achieved **93%** accuracy in document classification, ensuring reliable outputs
- Reduced turnaround time, enabling faster decision-making and improved operational agility
- Optimized operational costs through efficient resource allocation, resulting in cost savings
- Increased productivity by **40%**, enhancing overall efficiency

Evidence Extraction from Medical Reports for a US-based Law Firm

Challenges

- Manual review of **10,000 PDF** documents every three months
- Extracting crucial evidence from medical records
- Resource-heavy process prone to errors

Solution

- Developed an intelligent document processing solution
- Automated the extraction of key patient information from handwritten and scanned documents
- Streamlined the evidence extraction workflow

Impact

- Reduced manual effort for extracting and processing patient information by **95%**
- Decreased processing time from weeks to hours, speeding up case progression
- Enabled customized reports, ensuring adaptability to evolving legal landscapes
