Unified silos and simplified operational resonsibilities create a best-in-class financial fusion center

Quantiphi's risk mitigation solutions include five critical stages

Key Success Stories

Fraud Detection Mechanism for a Leading Digital Payments Company

Problem Context

The UK-based client is a leading digital payment service provider offering businesses a faster, easier, and more reliable way to move money. The client sought to develop a real-time fraud detection system with low false positives for their Point of Sale transactions.

Solution

Quantiphi developed a platform that had real-time fraud flagging and benchmarking capabilities, API endpoints for fetching risk scores, and explainability for flagged transactions. In addition, the platform had a rule engine and API endpoints integrated with the client's existing transaction pipeline.

Impact

- Developed a cloud-based fraud prevention platform with <1second response time serving 10,000+ customers daily
- Enabled the client to address challenges such as data limitation, class imbalance and high dimensionality in input dataset (~700 features in total)

Quantiphi is an award-winning Al-first digital engineering company driven by the desire to reimagine and realise transformational opportunities at the heart of business. visit: www.quantiphi.com
